**BBN Engineering
pvt ltd**

“Building the Future Together,Safety above all”

ABOUT OUR COMPANY

A Brief Story About The Company

Established in 2008 in Panipat, Haryana, India, by Mr. Rakesh Kumar Sharma, M/S- B.B.N Engineering Pvt. Ltd. has grown from a visionary endeavor into a dominant force in specialized industrial services, built on the foundational principles of trust and mutual client-company respect. The company has achieved sustained financial growth and robust operational success, a direct reflection of its long-standing client relationships and efficient project execution within strict timelines. Under the capable leadership of Mr. Sharma, B.B.N Engineering was a pioneer in adopting advanced technology, notably being among the first companies to successfully integrate and utilize the Layher scaffolding system —a strategic move that significantly enhanced safety, speed, and versatility across projects

The background of the page is a photograph of an industrial site. It features a complex network of blue-painted metal pipes and a dense structure of scaffolding. The scaffolding is made of vertical and horizontal metal bars, creating a grid-like pattern. The lighting is bright, suggesting a sunny day, and the overall color palette is dominated by the blue of the pipes and the grey of the metal scaffolding.

Furthermore, the company has strategically diversified its service portfolio beyond core onshore scaffolding Erection & Dismantling to include crucial support for mechanical work and complex piping work, providing essential, safe, and stable working platforms for the installation, maintenance, and repair of heavy machinery and intricate process piping networks in demanding industrial environments. This specialized technical capability, combined with a commitment to continuous infrastructure upgrade and employee training, has secured B.B.N Engineering Pvt. Ltd. a distinguished client list featuring industry leaders such as **HPCL-HMEL, IOCL, L&T, GAIL, ONGC, VEDANTA**, and **ULTRA-TECH** cementing its status as a sophisticated and financially successful partner in the energy and infrastructure sectors.

VISION

To be the globally recognized leader and preferred technical partner in industrial construction support, distinguished by a culture of absolute safety, pioneering technology, and sustainable client trust.

MISSION

01

Maintaining the highest safety standards, backed by a high-caliber workforce and robust infrastructure.

02

Pioneering the successful integration of advanced systems like Layher scaffolding to deliver superior, versatile, and cost-effective access solutions.

03

Delivering expert scaffolding, mechanical work, and critical piping support to meet the complex technical requirements of industry leaders.

04

Building long-term, mutually respectful partnerships with clients, ensuring our financial growth is a direct testimony to their success.

OVERVIEW

Scaffolding Work

B.B.N. Engineering Pvt. Ltd. focuses on providing complete, high-efficiency, time-bound scaffolding solutions, specializing in Onshore and Offshore Scaffolding Erection & Dismantling. Our service is not merely about erecting temporary structures; it is about providing specialized, safe, and custom-designed access solutions for major industrial projects. We offer both Tubular and Ring Lock Layher Scaffolding Services.

LAYHER ALLROUND SCAFFOLD SYSTEM

B.B.N. Engineering Pvt. Ltd. possesses advanced specialization as a service provider utilizing the Layher scaffolding system, demonstrating a commitment to versatile and high-quality access solutions with over 08 year of experience.

Layher. 

More Possibilities. The Scaffolding System

Mechanical & Piping Work

B.B.N. Engineering is dedicated to delivering precision mechanical services, focusing on the fabrication and seamless installation of critical project components. Our expertise spans a wide range of structures, including complex piping systems, specialized pressure vessels, and foundational structural steelwork. This capability is underpinned by a team of highly skilled technicians and engineers who utilize state-of-the-art equipment to ensure all fabricated items meet stringent quality and specification standards. Furthermore, BBN Engineering distinguishes itself during the installation phase by providing efficient, precise, and integrated solutions, guaranteeing that all fabricated components are seamlessly brought together and integrated perfectly within the client's overall project framework.

Painting & Blasting

B.B.N. Engineering Pvt. Ltd. extends its comprehensive industrial support to include specialized blasting and industrial protective coating (painting) services, which are non-negotiable for maintaining the longevity and operational safety of assets within refinery and heavy industrial environments. This integrated capability allows BBN Engineering to be a one-stop-shop for maintenance shutdowns, where they can quickly erect specialized scaffolding (Layher), use it for access during the blasting/painting phase, and then support the necessary mechanical work, ensuring maximum efficiency and minimized downtime.

“SAFETY FIRST, ALWAYS”

Safety is of prime importance here at B.B.N Engineering Pvt. Ltd. Hence, we believe that following a few simple safety guidelines can prevent any injuries occupational hazards at the work place. Safety, at any juncture is not while a job of any nature whether on field or off is in progress.

- ☒ We strive to make our work place safe and conducive for our employees.
- ☒ In order to improve safety practices and performances all firsthand requirements are maintained.
- ☒ Our employees are educated about the procedures and benefits of systems.
- ☒ Employees are educated on additional safety measures in order to avoid any damage to client's property while the job is in progress.
- ☒ Optimal use and benefits of safe working procedures and practice construction jobs.
- ☒ Quality and safety systems are monitored at regular intervals.
- ☒ Safe working tools and tackles, personnel, protective equipment are provided to ensure a safe working environment.
- ☒ Risk control via safety measure implementation.
- ☒ In order to avoid any unwanted work place hazards clients instructions safety procedures are followed at all times.

9001:2015

Safety holds the highest priority at B.B.N Engineering Pvt. Ltd. Therefore, we think that adhering to some basic safety rules can avert injuries or work-related risks in the workplace. Safety is never compromised at any stage while work of any kind, whether on-site or off-site, is being carried out.

Ø Workers are instructed on extra safety protocols to prevent any harm to the client's property during the ongoing work.

Ø Tools and tackles for safe work, along with protective equipment and personnel, are supplied to create a secure working atmosphere.

Ø Control of risk through the execution of safety measures.

To prevent any unnecessary workplace hazards, client directives regarding safety protocols are adhered to consistently

45001:2018

We seek active engagement from our line and staff management to operate according to their informed responsibilities, ensuring all reasonable precautions are taken to safeguard the health, safety, and welfare of those who may be impacted by our activities.

We are dedicated to: -

- To fulfill our legal responsibilities in providing safe and healthy work environments.
- To recognize risks and implement proper measures to avoid incidents.
- To reduce waste, avoid air pollution, and uphold cleanliness standards to create a healthy environment.
- To proactively oversee and regulate health and safety in the workplace.
- To pursue ongoing enhancement in our health and safety management and performance by regularly reviewing and updating this policy

TRAINING PROGRAM

Recognizing that rigorous safety training is paramount to success, BBN is dedicated to equipping inspectors and erectors with the necessary expertise. We offer a structured training scheme featuring regular seminars designed to prepare our clients for the complex and evolving challenges within scaffolding. This core curriculum is comprehensively supported by practical, hands-on product training courses and routine meetings for erectors, fostering essential knowledge sharing among industry experts. Ultimately, BBN provides end-to-end educational resources covering all aspects of safe and effective scaffolding construction.
